

# NATIONAL LAND COALITIONS

## TAKE ON THE CLIMATE AND NATURE CRISES

ILC's National Land Coalitions are connecting 330 land partners across 30+ countries, but these NLCs are leading the fight against the climate and nature crises by putting LAND rights at the front and centre.

**RAINFOREST TRUST PROJECTS**  
Rainforest Trust has committed 3.5 million USD to the ILC network to establish over 230,000 hectares of community-protected areas in Peru, the Philippines, and Indonesia while safeguarding over 80 threatened species.

**GLOBAL LAND CATALYST**  
A financing mechanism for National Land Coalitions to engage in national climate and environment advocacy, including influencing the revision of their countries' Nationally Determined Contributions (UNFCCC), National Biodiversity Strategies and Action Plans (CBD), and the National Action Plans (UNCCD).

A financing mechanism for National Land Coalitions to engage in national climate and environment advocacy, including influencing the revision of their countries' Nationally Determined Contributions (UNFCCC), National Biodiversity Strategies and Action Plans (CBD), and the National Action Plans (UNCCD).

### SENEGAL

Six multi-stakeholder consultations will integrate tenure security into land degradation neutrality targets and restoration frameworks for National Action Plans. Each consultation will produce an external report – to be presented during the 16th session of the UNCCD COP – and a methodological process for easy uptake in other countries.

### BOLIVIA

Before the 2025 general elections, NLC Bolivia will support peasant farmers, Indigenous Peoples and local communities to advocate for the passage of the “Bruno Racua” law on the sustainable use of the Bolivian Amazon. This proposed law ensures the inclusion of Indigenous Peoples and local communities in relevant decision-making processes, including the enforcement of FPIC.

### TOGO

NLC Togo will collaborate with the government to review its NDCs every five years, conducting grassroots consultations to measure how well the NDCs incorporate community land tenure. The resulting studies will guide the incorporation of land-related policy objectives in future iterations of the NDCs.

### NEPAL

Collaborating with the government, NLC Nepal is studying the climate crisis' impact on rural land, working to include tenure rights for women, landless people, Indigenous Peoples and local communities into the country's Climate Change Bill, as well as other national climate policy processes.

### MONGOLIA

NLC Mongolia is advocating for pastoralist communities to be recognised as credible carbon market actors - assessing the impact of traditional pasture management and rangeland restoration practices on carbon sequestration.

### PHILIPPINES

NLC Philippines is working with Government agencies – including the Department of Environment and Natural Resources (DENR) and the NCIP (National Commission on Indigenous Peoples) – to revise the Philippine Biodiversity Strategy and Action Plan and lobby for a national ICCA (Indigenous Peoples and Community Conserved Areas) bill.

### JORDAN

To fight desertification and implement Jordan's National Action Plan for UNCCD, NLC Jordan will support communities to establish a Hima – a sustainable pastoral land management approach - to protect traditional pastoral land and water harvesting locations.

### INDONESIA

This project will protect the Bagantung Lake and its surrounding forest and peatland ecosystems from degradation and exploitative land use practices, especially due to the expansion of oil palm companies.
